

Southlands Crossing Affordable Housing Project

The Medicine Hat Real Estate Board recently celebrated the opening of Southlands Crossing, an affordable housing complex in their community. The project was a partnership with the Medicine Hat Community Housing Society. This is the fourth affordable housing project that REALTORS® from the Medicine Hat Real Estate Board have helped develop for their community.

The Alberta Real Estate Foundation contributed \$75,000 to the project along with a \$25,000 contribution from the Medicine Hat Real Estate Board. The \$100,000 contribution from both real estate organizations was the largest financial commitment to the Southlands Crossing project.

The Southlands Crossing project has 50 affordable one or two bedroom rental units in seven buildings. Each building has either six or eight apartments and the ground floor units are all built for accessibility. In addition, the project includes landscaping and trees which bring additional warmth and charm to this attractive housing complex. The complex was officially opened in October 2009.
